

## [Student research helps unravel bacterial communication](#)

Princeton University senior Sofia Quinodoz conducted two thesis projects: uncovering how bacteria communicate to coordinate group behaviors, and exploring the impact of Argentina's Dirty War.

## [AP phone records seizure is consistent with Constitution's intent, says researcher](#)

Though critics depict the AP subpoenas as a threat to the freedom of the press, Princeton Assistant Professor Rahul Sagar finds that the government's actions are consistent with the Constitution's intent.

## [New analysis suggests wind, not water, formed mound on Mars](#)

A 3.5-mile high Martian mound that scientists suspect preserves evidence of a massive lake might actually have formed as a result of the Red Planet's famously dusty atmosphere.

## [Challenges for U.S. in the Middle East take center stage at colloquium](#)

Experts outlined the interconnected elements needed for positive change in the Middle East: support for democratic change; economic opportunity; and regional peace and security.

### Upcoming Events

*Free and Open to the Public*

Sat., June 1 from 9 am to 4 pm

[Princeton Plasma Physics Laboratory open house](#)

**Research at Princeton** is a monthly newsletter publicizing discoveries made by University faculty, research staff and students. It is produced by the Office of the Dean for Research.
