

[What beating hearts and power grids have in common](#)

Systems such as a beating heart or a power grid that depend on the synchronized movement of their parts could fall prey to an invisible and chaotic tug-of-war known as a "chimera."

[Economist studies environmental threats to children's health](#)

Data on births, deaths, insurance claims and other records are helping economist Janet Currie tackle big questions about child health.

[Bone tumor identified in 120,000-year-old rib of Neandertal](#)

Researchers have identified a benign bone tumor in the rib of a young Neandertal who lived about 120,000 years ago.

[From our blog: Migrating animals add new depth to how the ocean "breathes"](#)

Small fish and plankton carry oxygen to sea depths, serving a crucial and underappreciated role in ocean chemistry on a global scale.
